Work Place Health

WHY IS ZGO™ SO IMPORTANT TO WORK PLACE HEALTH ?

- A screen attached to a fixed monitor stand with little multi-directional adjustment will cause a computer operator to lean forward and adopt poor posture. Repeated action of this nature can ultimately lead to permanent damage to the back, resulting in pain.
- Zgo™ allows the operator to move the screen to the most comfortable position, and then change that position during the course of the day so that the all-important back support of the chair is constantly in play.
- When used correctly with a good ergonomic chair, Zgo™ helps minimize the risk of back injury and resultant back pain.

ADDITIONAL OPTION:

znote™

Expanding Laptop holder.

Why is the Zgo™ Monitor Arm a market leader?

Zgo™ is a new class of Monitor Arm. It provides simple installation, minimizes set-up requirements and is adaptable to a host of different monitors.

▶ Latest Spring Technology

Zgo™'s spring is compressed to provide a balancing force against the monitor weight (ranging from 2.5kg/5.5lb to 9kg/19.4lb). Zgo™ allows the monitor to "float" and to be adjusted effortlessly and continuously. Patent Pending.

▶ Concealed Cables

Monitor cables are cleverly contained, retained and hidden from view.

▶ Unparalleled Usability

Zgo™'s unique 'four bar' mechanism provides smooth and frictionless tilt to create glare free viewing of the screen. Patent Pending.

▶ Tool-Less Adjustment

Tool-less adjustment of the spring compression is achieved by winding the retractable knob which is linked to the spring via an ingenious gear box and bevel gear system. Patent pending.

▶ Spring Tension Indicator Gauge

Zgo™'s spring compression gauge allows pre-setting of the calibration, faster installation and lower labour cost.

▶ Quick Release Mounts

Zgo™ offers two quick release mechanisms enabling rapid screen interchange or alternatively replacement of the screen with a laptop (see Znote™). Patent Pending.

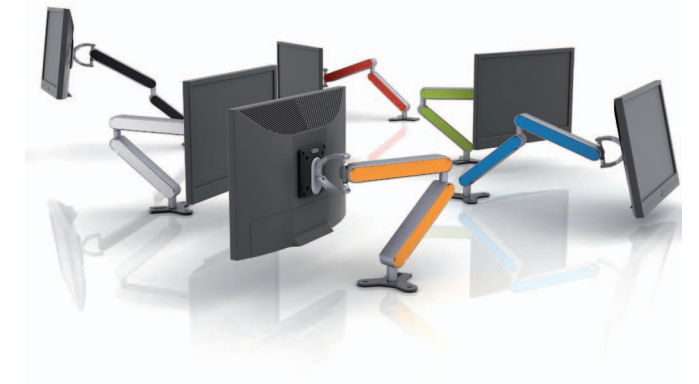

▶ 180° Lock-Out

This unique feature prevents the monitor from colliding with a glass wall or privacy screen.

▶ Tool Less Installation

Zgo™'s two piece interlocking desk clamp provides rapid, effortless attachment to desk tops with a thickness range of 18mm/0.71" to 60mm/2.36".

Colour Options

The Zgo Arm is the only monitor arm to offer a vibrant colour palette of interchangeable snap-in covers for fun, fashion and impact in the workplace.

Colour options include:

Blue PMS 3005

Orange PMS 151

Green PMS 382

Red RAL 3020

Grey PMS 426

White RAL 9010

ADDITIONAL OPTION:

zhub™

Four port desktop USB.
